Grades Lower But Few Distressed Animals Offered

Although the Glades pastures are seemingly hurt less than those north of us the animals offered Monday showed wear and tear of wet weather and a generally lower grade, and a few of the glades' lower average in price.

Some distressed cattle are being shifted to other pastures, but this number is small.

The following reflects sale of 139 steers, 126 calves and 87 cows, 53 heifers, 97 yearlings and 1 bulls.

ARENA NEWS

Hi Folks! If the good weather keeps up at the rate its going won't be long before the club will be "Back in the Saddle Again". The arena is still muddy but with "Old Man Sgo" riding the range again its should be in shape for riding in the next few weeks. Work will start

on the new Arena in the near future and ideas, suggestions, etc. will be greatly appreciated. We want you to feel that the Arena is yours too not just the club's because you are the ones who will enjoy it and keep it going by your interest and support.

When one hears the word "cowboy" their thoughts usual-

ly turn to the Western part of the United States. True, in the West, the cowboys and the cattle industry first flourished and became famous, as part of the great Western movement of the 1800's. Years later after Florida became civilized and more inhabited, the people discovered certain parts of Florida were ideal for the raising of cattle. But it has only been in the last five to ten years that thought was given to raising cattle in quantity in the Glades area. For years the main occupation of the Glades people was farming. While farming is still a major occupation people are turning more and more toward ranching. Every where you go, you'll find ranches springing up. Land that has been under water for years is being drained and turned into pastures; land that recently was used to grow vegetables is now planted with sod, our cattle market is one of the best known in the state. With these things behind us it is not difficult to see that the cattle industry is here to stay. As members of this ranching community, our best words do us part in representing the Glades Area as one of the up and coming cattle sections of the state.

As our part we plan to enter shows in different towns, sponsor rodeos and stock shows of our own, and by building one of the best rodeo arenas in the state. We can do our part in the community by making honor loyalty, and respect of ones fellowmen, all necessary in a good citizen, the basis for our club. The ability to work together and sportsmanship in the true sense of the word are also included in the basis for our club as these things are necessary in order to accomplish our aims and goal. It was with these things in mind that the "Glades Saddle Club" was organized. Thanks to all you wonderful people who have really been behind us and helped by showing your interest and turning out for our social doings, I know the club will succeed and that one day in the future we will give you every reason to be proud of us.

Now that the hurricane season has almost passed we've decided to have a "Little Blowout" of our own to end the season up right. Don't get alarmed—we're talking about a formal dance with music and we'll sponsor about the last of Nov. Know everyone will be interested so we'll let you know when and where as soon as the date is definite.

Regular meeting was held at the Glades Livestock Market, Thursday night with president, Bill Hair, presiding. Minutes of the last meeting were read by Doris Odom, Secretary. Discussion was held on various topics with the coming dance and the new arena heading the list. After the business meeting, the club was entertained with music and a skit after which singing was enjoyed by all. We have a lot of fun along with the work we do and we'd like to have more of the people share it with us so whether you are a member or not, come on out to the meetings once in a while, you are more than welcome. Be seeing you—but for now—Adios Amigos!

He spent 17 years in radio broadcasting, writing, directing and announcing coast-to-coast network radio programs and traveling for several years as a consultant in management and operation of radio stations in many states. He has operated his own advertising agency and is presently employed by a national trade association in Sunday School work, a Mason, member of the Sales Executives' Club, Toastmasters Club, Lions Club and a volunteer Public Information Chairman of a Red Cross Chapter.

He has written articles in scores of trade magazines, national publications and published some fiction for 20 years.

The material that appears in "60 Second Sermons" is gathered

from nearly a half century of experience with men and women in all walks of life. It is written in an appealing, practical vein in the hope that a businessman can pass to others some fundamentals of hopeful, helpful living which man gains the hard way. His "Sermon" thoughts are not pulled from "thin air" but from experiences in life and living, in being hungry, out of work, sorrowful; well fed, employed and happy. "60 Second Sermons" are messages to you from a Christian businessman, written from experience, bitter and sweet, but always real.

put "THE MAN WITH THE HOE" on wheels

It has been said that a man with a hoe is the most expensive item on the farm. That is especially true with vegetables, melons, berries, fruits and other crops that require precision planting, cultivation and weeding.

On the seat of a Model G Tractor, one man can eliminate a tremendous amount of hand work. He can place seed where you want it, to the smallest fraction of an inch. He can weed and cultivate gently, surely—right up to the row. He can handle up to six rows at a time.

Model G implements mount in front under the tractor's open arch. Crop rows and tools are always in full view.

Let one pair of hands on the wheel of the Model G replace many pairs on hand tools. Stop in for full information.

Most-liked low-priced car

... among people who want more for their money when they buy ... and more money when they sell!

There's a big reason why more folks are buying more Fords than ever before. No other low-priced car offers so many of the things people want and need for today's driving. In fact, to get such "Worth More" Ford features as a V-8 engine, completely automatic transmission and fine-car power steering in any other car, you'd have to step well up from the low-price field.

Of course, Ford owners will discover that Ford's worth more when they sell it, too. Surveys of used car prices show year-old Fords returning a higher proportion of their original cost than any other car.

because it's most like high-priced cars

... more and more people are considering Ford as the one fine car in the low-price field!

It's hard to believe that a car which is built like the finest still sells in the low-price field. Yet a Ford with its built-in Crestmark body, its Full-Circle Visibility (most in its field), its new fine car ride and roomy luggage locker (roomiest in its field) delivers at a figure that keeps it right down in its price class.

Ford's the only low-priced car which offers you a choice of a completely automatic transmission (Fordomatic), Overdrive or Conventional Drive. And Ford Master-Guide, available on all V-8 models, is the last word in power steering ... makes turning up to 73% easier, yet retains the natural feel of the wheel on the straightaway.

See ... Value Check ... Test Drive the Ford of your choice at your Ford Dealer's. Find out why Ford is America's "Worth More" car.
